

Overview – CHIPDRIVE® Smartcard Commander Editions

CHIPDRIVE® Smartcard Commander – unregistered version

The unregistered version can be downloaded on the internet.

Smart card data can be displayed; however, editing and saving is not possible.

CHIPDRIVE® Smartcard Commander “GSM Edition”

The “GSM Edition” is already included in delivery of all CHIPDRIVE® SIM Card Stick readers (SCR3320).

Data of GSM cards can be managed, edited and resaved on the card in no time.

More information about restrictions of the “GSM Edition” can be found at “Restrictions – Overview”.

CHIPDRIVE® Smartcard Commander “Personal Edition”

The “Personal Edition” is already included in delivery of all CHIPDRIVE® smart card readers for smart cards in ID-01 format (typical bank card size).

Data of popular smart cards (e.g. health insurance cards, phone cards, HBCI cards, signature cards, ...) can be shown with this version.

More information about restrictions of the “Personal Edition” can be found at “Restrictions – Overview”.

CHIPDRIVE® Smartcard Commander “Professional Edition”

No restrictions at all.
